

LEARN TO CODE BY PLAYING

A web-based, quest-driven world where you program a robot named **Qubit** to farm, mine, and automate, mastering real programming fundamentals one challenge at a time.

38

QUESTS

hands-on coding challenges

36

COMMANDS

to control Qubit & drones

7

CATEGORIES

from tutorials to logic

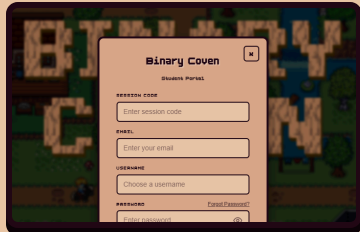

3

SKILL TIERS

beginner to advanced

HOW IT WORKS

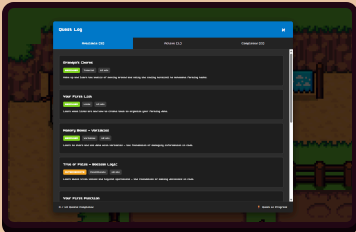

1

JOIN

Enter the session code your instructor gives you and create your account.

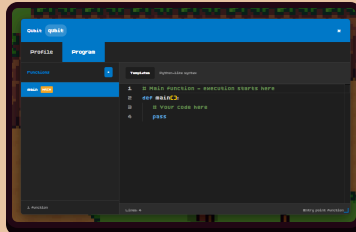

2

QUEST

Pick a quest. Each one teaches a single programming concept.

3

CODE

Write Python-like commands in a real Monaco code editor.

4

RUN

Hit Run and watch Qubit execute your code live on the grid.

from session code to running code

WHAT YOU'LL MASTER

core concepts, taught through play

OPTIMIZATION

FOR STUDENTS

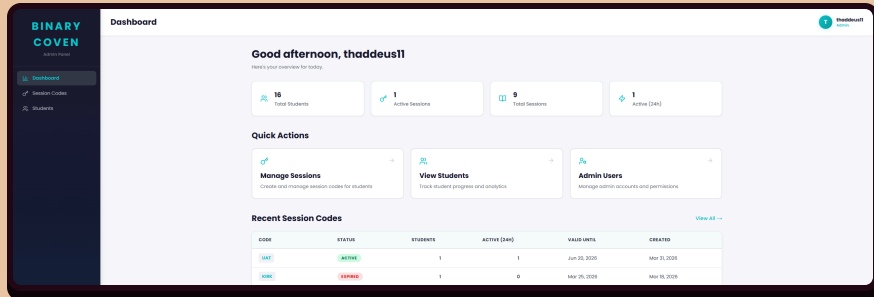

Code an adventure.

- ✓ **REAL CODE EDITOR.** Syntax highlighting & autocomplete, powered by Monaco.
- ✓ **LIVE EXECUTION.** Watch your robot act out every line you write.
- ✓ **PHASED QUESTS.** Instant feedback, retry freely with no penalty.
- ✓ **DRONES & ENERGY.** Program helpers and plan efficient routes.

FOR INSTRUCTORS

Run the classroom.

- ✓ **SESSION CONTROL.** Create, schedule & curate quests per class.
- ✓ **LIVE DASHBOARD.** Track students, sessions & activity at a glance.
- ✓ **OBJECTIVE TRACKING.** See exactly where each student is stuck.
- ✓ **CODE REVIEW.** Inspect every code run, by quest and phase.
